Promising Apple Seedlings
and
Standard Varieties of Apples

New Jersey No. 1 under inspection on the original tree
at New Brunswick

Propagated and Distributed by

THE NEW JERSEY APPLE INSTITUTE, Inc.

NEW BRUNSWICK, NEW JERSEY

Fall, 1949 - Spring, 1950

The New Jersey Apple Institute has available for Fall 1949 planting some well grown, one-year-old trees of several promising apple seedlings, developed at the New Jersey Agricultural Experiment Station. Trees of six standard varieties also are available through the same organization. These trees are propagated on Hibernial and Virginia Crab rootstocks. Orders are being accepted for the following varieties :

N. J. No. 1

This is a cross of Gallia Beauty and White Winter Pearmain. The fruit is similar to Rome in size and shape. The color and quality have been better than Rome at New Brunswick. The fruit hangs to the tree better than Rome and ripens about one week later or about with Paragon. It is a good cooking and baking apple. It keeps well in storage and should make a good substitute for Rome and Paragon.

N. J. No. 2

This is a cross between Melba and Twenty Ounce Pippin. The tree is productive, strong, hardy and resistant to fire blight. The fruit is yellow when fully mature, but suitable for cooking before the color changes from green to yellow. It is attractive and ripens a few days later than Starr. It is one of the best cooking apples of its season, and good for dessert when fully mature.

N. J. No. 3

The fruit of this seedling resembles McIntosh in general appearance. The tree is of medium size and productive. The fruit develops more red color than McIntosh at New Brunswick and hangs to the tree five days to a week later. It is a promising substitute for McIntosh where the latter normally does not develop enough red color. The supply of trees is rather limited.

N. J. No. 4

The fruit resembles Delicious in size, shape and flavor but ripens almost a month earlier. It is not a very satisfactory cooking apple, but should be popular as a dessert apple for those who like the flavor of Delicious. The tree, which is a semi-standard, has not been any more productive than Delicious.

N. J. No. 12

An attractive, medium to large, firm, red apple ripening during mid-August at New Brunswick. The tree is upright and of moderate size and vigor. The supply of trees is rather limited.

STARR

A large, green cooking apple harvested in July in central and southern New Jersey. All of the trees of this variety are on Hibernial stock, which is resistant to blight and collar rot.

ORDER BLANK

Date....., 19

To THE NEW JERSEY APPLE INSTITUTE, INC.
c/o C. H. Steelman Fruit Nursery,
R.F.D. No. 3, Princeton, New Jersey:

I would like to place an order for the following trees:

<i>Variety</i>	<i>No. of Trees</i>	<i>Grade Preferred</i>
N. J. No. 1.....
N. J. No. 2.....
N. J. No. 3.....
N. J. No. 4.....
N. J. No. 12.....
Starr.....
Double Red Delicious.....
Turley.....
Yellow Delicious.....
Oregon Scarlet Stayman.....
Red Rome.....
.....

LIABILITY AGREEMENT

Great care is used to avoid mistakes, but in case any trees prove to be untrue to the name under which they are sold, the original order will be replaced or the amount actually paid for such stock at the time of purchase will be refunded. The purchaser agrees to accept the trees on these terms.

Signed :.....

Address :.....

I will call for the trees at the Nursery.....when notified they are ready.

Please ship the trees to :.....

Make checks and money orders payable to the New Jersey Apple Institute

DOUBLE RED DELICIOUS

A red bud sport of Delicious with all of the good qualities of that popular variety. It may be harvested earlier and develops more red color than the regular Delicious. All trees propagated on Hiberna rootstock.

TURLEY

A large, attractive, red apple of good quality ready to harvest about a week before Stayman. It does not crack like Stayman and develops more red color similar to but brighter than Paragon. It is an excellent cooking apple and superior to Paragon for eating. It is the most promising substitute for Stayman.

YELLOW DELICIOUS

An attractive, high quality, golden yellow apple. Excellent for cooking and eating.

OREGON SCARLET STAYMAN

This is one of the most attractive red bud sports of Stayman. It originated in Oregon. Other than developing fruit with more and better color both tree and fruit are similar to the regular Stayman.

RED ROME

This is one of the most promising red sports of Rome Beauty. The fruit develops an attractive, bright red color and the size compares favorably with Rome. The trees are similar to Rome in size, vigor and productiveness. All trees available are on Hiberna rootstock.

GRADES AND PRICES

	<i>1 to 9</i>	<i>10 to 49</i>	<i>50 to 99</i>	<i>100 to 499</i>	<i>500 or more</i>
<i>Grade</i>	<i>trees</i>	<i>trees</i>	<i>trees</i>	<i>trees</i>	<i>trees</i>
3 to 7 feet.....	\$1.50	\$1.25	\$1.10	\$1.00
5 to 7 feet.....	\$2.00

Trees may be secured at the C. H. Steelman Fruit Nursery on the Clarks-ville-Port Mercer Road, about one-quarter mile from State Highway Route 26, or U. S. Route 1. Telephone Princeton 1935-J-1.

PLACING ORDERS

All orders for trees should be sent to the C. H. Steelman Fruit Nursery, R. D. No. 3, Princeton, New Jersey. A deposit equal to ten per cent of the total cost of the trees is required with each order and the balance at the time of delivery.

All checks and money orders should be made to the order of the *New Jersey Apple Institute*.
